

TEE-BONE SLIM SAYS "KEEP PACE WITH HARVEST"

DAVID CITY, Nebr., July 24.—One-Ten harvest drive is moving along satisfactorily up to this point, and will continue to gain momentum as it goes along. Many members are not as yet alive to the importance of this particular drive and many for that reason neglect to fully co-operate to the fullest extent—and may thereby contribute to whatever may be lacking in its measure of success.

I can think of only one thing that may sour the outcome and that is the membership may over-reach themselves and travel ahead of the harvest—this should not be. Under no circumstances should they be more than 24 hours ahead; inasmuch as being too previous marks them and operates against their economic security.
