

## T-Bone Slim

N. Y. CITY.—Harry March, 15, murderer, sentenced to 20 years.—He will be 35 when he gets out. Fifteen best years of his life shall be spent in prison. What comes before and what comes after doesn't count.

Make it mandatory upon our opinion worshipping courts to sentence murderous children to four years or all years and days they lack of being 21—except the last day.

If reformatories are as unable to accomplish the cure in four years, or the growing years, fire the overseers and let the prisoners choose their instructors.

Schwarz advertises his Primadora cigar with a strike of the cigar makers. Schwarz got busy having signs made exemplifying the taste of his wonderful cigar. This put bread and butter on the painters' table, tongue between their teeth—holding the place where their belly used to be.

Schwarz ought to make his peace with the cigar makers, pay the boys what they want, and a little extra, for having gutts to strike, for I've smoked worse cigars than Primadora and surely Schwarz can admire a brave cigar maker.

\* \* \*

Strikes dot the city in all parts of it. To all purposes the breakouts constitute a general strike the engineering of which is in the instalment plan. Gains here and there are accomplished with everpresent aid of public sentiment, a parcel of all strikes in congested areas. Adjustments are made that seem heroic and the pelt is stretched to cover the restless portion. Time will come tho when the pelt won't stretch and new robes are needed.

Bronx bakery workers are on circum-spect war path using the dilletante method—subdued pretest.

On the westside seamen broke up the tranquility of the "Y" and the complacency of the contended refugees, blockaded themselves in the holy of holies and surrendered to superior forces of law. Formality of paying harbor boatmen is dispensed with in many cases and thus it is business is being carried on on other peoples' money that was, or suspicious thereof.

Say, 100,000 marched to Battery in protest of Hitler policies — I doubt if they know what it's all about. German position is retreat. She was forced. Now they don't like that position. Neither do I.

In Germany the people shout, "Hitler, our Savior!" In the Bronx the folks holler, "God damn, Hitler!"

Let's keep our shirts on.

Germany had enjoyed a certain amount of political freedom under a stiff-necked form of republicanism—people prancing around as social democrats. No social-democracy was present and could not have been because Germany was wallowing in Industrial Autocracy.

Industrial autocracy being the more potent can kill all political freedom or social-democracy.

Crowded from all angles Germany could only retreat—go backward. She took her political state from freedom's side and set it down alongside of industrial autocracy, both now based on absolutism—unquestioning obedience.

Let us keep our shirts on.

Had not Germany been driven so hard, she no doubt would have taken industrial state from slavery's side and set it down alongside of political freedom, both now social-democracy — for verily, industrial autocracy cannot lick political democracy on the home grounds, in freedom's territory.

First they drive Germany back and then they holler their heads off because the move threatens all civilization.

Let us forget Hitler for a moment and do some choosing in our own hardpressed land. Industrial autocracy is source of all human misery, cause of all strikes, wars, murders, robberies (no murder is done that has not economic base).

Therefore choose.

Join the I. W. W., acquire economic power and put an end to all robberies, murders, wars, strikes and miseries.

You can do it; but you won't do it by not doing it.
