

Work Divided In Smaller Chunks Goes Further

By T-BONE SLIM

Industrialized China spells *finis* for Japan. Rather than swallow *finis*, Japan swallows China. Merely industrial rivalry, an economic question.

*

Man is the only animal that commits such crimes as raping children. Man also skips more meals than any other animal. Is there a connection?

New York has had an epidemic of such crimes recently and in the last case the family of two had been getting \$13.30 every two weeks from the relief. Three dollars thirty-two and one-half cents each per week. Less than 50 cents a day to live on.

Scientists have cudgelled their brains trying to find a cure for this. Sterilization, etc. . . .

Now Mayor Fiorello H. La Guardia steps out and tries to solve it but it took the great professor, T-Bone Slim, to hit the nail on the head.

Give the boys three pork chops for breakfast. So, Fellow Workers, watch the wages like a hawk for your very virtues may depend upon them.

In any case its best to be on the safe side and jack-up the wages; for degeneration is at the right and left of us and 50 new millionaires are starting out among us shortly on the strength of William Rockefeller's last will and testament.

* * *

O gee, gosh, boys and girls, Finland has 3,200 unemployed listed in a population of 3,800,000—and one looks as if he aint looking for work.

Can it be that Finland too has lost her sense of direction?

Thirty-two hundred idle and only thirty-eight hundred thousand working.

If this keeps on old Koysti Kallio will have a fit.

Remedy: Divide the work into smaller chunks.
