

Fellow sinners and workless wonders, the text "for to-time is" It takes a crook to catch a crook. Does that mean they hire an unemployed crook to shoot it out with an employed one? If so, its not a bad idea; the bullets then would not be so hard on their own digestion. Not a bad idea at all. This way the crooks exterminate themselves... Nothing new about it, labor has been doing so for years and as "Whiskey" Robn said, "The percentage is against us." But, tremble. Suppose the crooks organize! Suppose the workers organize! Omigosh! the big boys would have to step out and shoot their own crooks. The big boys would have step out and fight their own wars, omigosh! Battlegrounds then would become as safe as field of pansies... and the crooks would die of old age (acute senility, to you). —  
 for they love one another
