

But he has discovered the world cannot become six times greater (in one generation) so as to absorb his six children on the favourable base he himself enjoys. (They cannot be stuck in from top — they must grow up from bottom — like potatoes.) — under this system of taking the leavings from antocerats table. Let us so organize that we get to the table first! (That's how I got my name) — The parasite, as such, will never reach the table.

1-bone Slim —

P.S.

The straw boss lost out on T-bone steaks every time we made a dash.

War causes epidemics — conscious pestilence and germs are given greater spread, broadcast. But that is no argument against war; same happens under peace.

But it is an indictment against our intelligence, in war or peace, for to spray ourselves with sickness, disease, death — it doesn't make sense. Abolition of war doesn't end this practice.

Abolition of the profit system ends this practice, both in peace and war, by the institution of intelligence into the seats of the great — and it will end war also as instrument of torture and death.

We better look to our economies for at this moment it is possible for one foodstuff trust to exterminate half the people of United States if it so desires.

We live then because the trust is willing.

We have their permission — How nice!
