

Silly Supermen:

IX

They would not listen to profets. They would not listen to Roosevelt. Now, mebbe they'll listen to LABOR. Ten million men have been jipped out of jobs and several million women. Interlocking directorates; where three dozen millionaires raid hundred thousand industries. ~~of money gone~~. One million, ten million, hundred million, billion, is chicken feed to them. Sillier three dozen never lived!

Shall the whole nation suffer because of three dozen money mad industrial lunatics?

That — is the question!

Labor should organize as one — voluntarily. Organized they'll be. But regardless of whether they organize or not **THEY'LL FUNCTION...**

Sudden and voluntary organization of ten million workers will make it easier on the knuckles and save much epidermis (excuse the latin) — "Gosh!"

"Will there be a fight, Slim?"

"Hell no!" as they say in Oklahoma, "I was just discussing industrial pursuits, hammer and chisel, sit down and stuff like that. Fight? Pook, pook! Peace will prevail for industrial overlords are gonna get sense like the Norwegian captain got religion."

But we've got to show ten million first.

Just now N.Y.C. (THE CITY) is in throes of labor-politico intrigue — muffed.

About one murder a day — but do not be discouraged: we have 8,000,000 people. It will take eight-million days to kill off all the people and by that time there will be lots of new ones; some of them 21.918 years old; if politico-labor intrigue doesn't get 'em before the eight million days is up. That is sole product of labor-politico connivance. Organize One Big Union (of labor) and progress.
