

Queen Elizabeth is here in all her warpaint.  
It won't be long now until Brittain and France bring  
their country over here for safe keeping  
I do not know what guarantees Uncle Sam gives  
but I spase they are good, plentiful and sufficient  
I'd hate however to bet on \$50,000,000 dinghy.  
Wisconsin is here loading "red-brass."

So, as I was saying, best thinkers assure me there is  
no need for any man to go hungry and every time you  
skip a meal the employers (industrialists) can buy seven  
steel-nosed bullets with the money and those seven bullets  
will put seven foreign workers (warriors) on perpetual  
fast. Clearly a profit for both sides of the overseers of  
international friction.

The assumption here is that "it is patriotism" and it may  
be—but the facts belie the assumption and the day is  
approaching when the Westwall and Maginot shall prove  
a white-elephant, militarism's folly.  
"The Age of Chiselry?"

"Incomes for our own industrial magnates is so  
commonplace and prolific that were it not for the  
haunt of the income tax they wouldn't have the slightest  
conception as to the amount and speed with which it  
piles in and naturally when income floods in at the  
rate of one or two million dollars a year many, many  
equally deserving pillars of society are forced on short-  
rations, chicken feed, and must of needs join the gangs-  
ters or step out and rob the WPA workers.  
Loyalties generally follow economic interests.

As, to illustrate: Western Poland's heart is in Germany  
because Germany buys her industrial production—first  
hate, then tolerance, finally respect.  
Vienna was relieved of the choking influence of cir-  
cumscribed supporting aeres  
And where reverse is true, loyalty is flown.

Even so as a farmers heart is democratic  
because he get barbwire cheaper under a  
democratic administration

Let us then get more wages so that we may  
become still more loyal.
