Other tools

- Data analysis

Twitch Chat Collector Tool

Start collecting chat data by selecting one of the three categories:

1. [Collect chat from a live Twitch channel](#)
2. [Collect VoDs by Twitch category/game, language and period of time](#)
3. [Collect VoDs for a certain Twitch channel or by a video id](#)

The collected data is automatically saved in **CSC Allas**, while also providing an option to download the collected data after collecting is finished.

The collected data can also be viewed and downloaded from the Data viewer section.
